

Moses Lab prospective graduate student information form

To be considered for an interview fill out all that apply:

- Undergraduate university: _____.
- GPA: _____.
- Favourite undergraduate class: _____.
- Previous research supervisor (if available): _____.
- Email and phone number for three references:
 - _____.
 - _____.
 - _____.

Something more fun (not required):

In this figure (unpublished, please don't share) protein sequences have been represented as points in a 2D-scatter plot using UMAP. CDKs and SRSFs are ancient, highly-conserved protein families involved in basic cellular processes. "Domain" here means globular folded regions from Pfam and "IDR" stands for intrinsically disordered region.

When we saw this, we were surprised but also fascinated. Why?

The surprising thing the figure shows is _____

This was fascinating because _____
